## GRADUATES.

---

This catalogue of graduates is as complete as the time and patience at our command could make it. We are indebted to friends for the addresses of a few who persistently neglected to answer our inquiries. There are six whose addresses we have not been able to obtain.

The reports of "occupation" are not as complete as could be wished. *Those only are marked as teaching who are known to have been so engaged since September, 1905.*

In all cases where a graduate has taught in more than one place during the year, the last place only is given, which will account for the fact that in one or two cases two persons are reported as teaching the same school.

In case of deceased graduates, the date of their death and residence at that time, or the town from which they entered the school, are given.

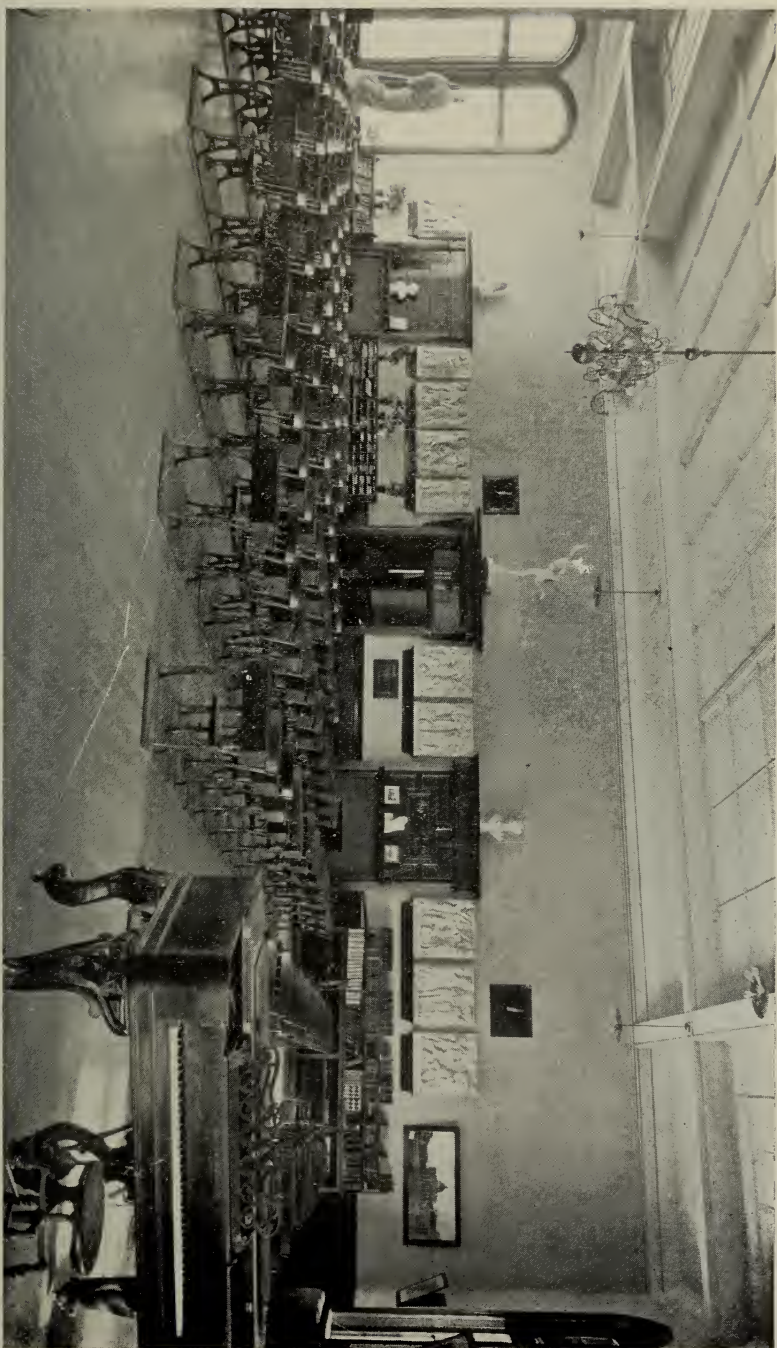

To save space, the name of the husband is placed immediately after the graduate's name.

Those marked (\*) have died. Those marked (§) are graduates of the Advanced Course; and those marked (†) have taught during the past year.
